

About Podcasts

Not familiar with podcasting? What's it all about?

Podcasting is just one more great way to listen to Pastor Mike Patterson at Grace Harbor Family Church services. The term *podcasting* comes from the name iPod™, which is a device/player that is produced by Apple Incorporated. An iPod is an electronic player that allows users to download files in .mp3 or AAC (Apple iTunes™ format).

The term *podcast* no longer specifically relates to the iPod, but rather to any software or hardware combination that permits the downloading and playing of files in user-defined time frames. **Other portable MP3 players are available as well.** They are available in various hard disk capacities that can support downloading of other larger files for audio and video.

Podcast FAQ

Q. I would like to make an mp3 audio CD of the podcast for my own personal, noncommercial use. May I do this?

A. Yes. All of our podcasts are free for your own personal, noncommercial use.

Q. I do not have an iPod or a digital mp3 audio player, but I would still like to listen to your podcasts. Is that possible?

A. Yes. You can listen to any of the mp3 podcasts on your computer with Windows Media Player, Real Player or QuickTime.
